Enhanced Project Descriptions

---

1. Commission Calculation Platform for a Mobile Operator

- **Summary**: Designed a flexible platform to manage partner contracts and calculate commissions.
- **Key Achievements**:
    - Automated commission calculations, reducing errors significantly.
    - Increased transparency with detailed reporting features.
- **Role**: Full Stack Developer.
- **Technologies**: ReactJS, NestJS, GraphQL, MySQL.
- **Team Size**: 22.
- **Duration**: 14 months (2023–2024).

---

2. Inventory Management Mobile App

- **Summary**: Built a mobile app to manage and track inventory using QR codes.
- **Key Achievements**:
    - Simplified inventory audits with real-time analytics.
    - Enhanced accountability by tracking item history and location.
- **Role**: Full Stack Developer.
- **Technologies**: React Native, NestJS, GraphQL, PostgreSQL.
- **Team Size**: 7.
- **Duration**: 3 months (2024).

---

3. Ringtone Selection Website for a Mobile Operator

- **Summary**: Created a platform for users to search, preview, and assign ringtones with advanced scheduling options.
- **Key Achievements**:
    - Increased user engagement with personalized scheduling features.
- **Role**: Full Stack Developer.
- **Technologies**: ReactJS, NestJS, GraphQL, MySQL.
- **Team Size**: 21.
- **Duration**: 5 months (2023).
- **Link**: [Meloring](#).

---

4. 360-Degree Feedback Platform

- **Summary**: Designed a platform for hierarchical employee feedback and analytics.
- **Key Achievements**:

○ Provided robust data visualization for historical comparisons.
- **Role**: Full Stack Developer.
- **Technologies**: ReactJS, NestJS, REST API, PostgreSQL.
- **Team Size**: 7.
- **Duration**: 2 months (2023).

---

5. Gift Card Management Platform

- **Summary**: Developed an admin panel and API to manage gift cards and transactions.
- **Key Achievements**:
  - Simplified operations with CSV-based import/export features.
  - Enhanced security through tokenized API interactions.
- **Role**: Full Stack Developer.
- **Technologies**: ReactJS, NestJS, REST API, MySQL.
- **Team Size**: 1.
- **Duration**: 1 month (2023).

---

6. Telesens Academy Website

- **Summary**: Built an advanced website constructor for course management and promotion.
- **Key Achievements**:
  - Enhanced flexibility with an advanced styling system.
- **Role**: Frontend Developer.
- **Technologies**: ReactJS, NestJS, REST API, MySQL.
- **Team Size**: 13.
- **Duration**: 3 months (2023).
- **Link**: [Telesens Academy](#).

---

7. Corporate Website for Telesens

- **Summary**: Created a dynamic page builder for streamlined content creation and management.
- **Key Achievements**:
  - Improved efficiency of content updates by 50%.
- **Role**: Frontend Developer.
- **Technologies**: ReactJS, NestJS, REST API, MySQL.
- **Team Size**: 13.
- **Duration**: 4 months (2023).
- **Link**: [Telesens](#).

---

8. Mobile App for Housing Rentals

- **Summary**: Developed a mobile app to facilitate property listings and rentals.
- **Key Achievements**:
    - Implemented map-based property searches for convenience.
    - Improved user engagement through an in-app chat feature.
- **Role**: Frontend Developer.
- **Technologies**: React Native.
- **Team Size**: 6.
- **Duration**: 2 months (2022).

---

9. Platform for Supporting Education of Children with Special Needs

- **Summary**: Designed a platform for managing schools, providers, and personalized education plans for children with disabilities.
- **Key Achievements**:
    - Automated data management, reducing manual effort by 300%.
    - Improved scheduling and reporting efficiency.
- **Role**: Lead Frontend Developer.
- **Technologies**: ReactJS, Express, REST API, MySQL.
- **Team Size**: 12.
- **Duration**: 9 months (2022).
- **Link**: CLL App Demo.

---

10. Mobile App for Calorie and Nutrient Tracking

- **Summary**: Maintained and debugged an app for tracking daily calorie and nutrient intake.
- **Key Achievements**:
    - Enhanced app reliability and user satisfaction.
- **Role**: Full Stack Developer.
- **Technologies**: React Native, Express, REST API, MySQL.
- **Team Size**: 2.
- **Duration**: 2 months (2022).

---

11. Website for Selling Fishing Nets

- **Summary**: Built a website showcasing products, prices, and store information.
- **Key Achievements**:
    - Boosted sales by 500%.
    - Increased customer base by 200% through improved accessibility.
- **Role**: Backend Developer.
- **Technologies**: ReactJS, Express, REST API, MongoDB.

- **Team Size**: 2.
- **Duration**: 2 months (2021).

---

12. Price Comparison Browser Extension

- **Summary**: Developed a browser extension compatible with Chrome and Firefox to identify lower-priced alternatives on various e-commerce websites.
- **Key Achievements**:
    - Integrated 20+ global e-commerce platforms.
    - Provided real-time price trends and savings options, reducing search time significantly.
- **Role**: Frontend Developer.
- **Technologies**: JavaScript.
- **Team Size**: 3.
- **Duration**: 2020.

---

13. PDF Generation Extension for Bulk Order Printing

- **Summary**: Added functionality to consolidate multiple orders into a single PDF for printing.
- **Key Achievements**:
    - Significantly improved printing speed by eliminating manual order processing.
- **Role**: Frontend Developer.
- **Technologies**: JavaScript.
- **Team Size**: 1.
- **Duration**: 2024.

---

14. Chrome Extension for Order Uploading

- **Summary**: Created a Chrome extension to upload orders from a website into accounting software.
- **Key Achievements**:
    - Reduced order upload time by 30%.
- **Role**: Frontend Developer.
- **Technologies**: JavaScript.
- **Team Size**: 1.
- **Duration**: 2020.

---

15. Chrome Extension for SMS Sending and TTN Tracking

- **Summary**: Designed a browser extension for Chrome to automate SMS sending and order status tracking.

- **Key Achievements**:
    - Streamlined customer notification processes, increasing speed by 300%.
    - Provided real-time SMS status updates (Sent, Delivered, Read, Error).
- **Role**: Full Stack Developer.
- **Technologies**: JavaScript, Express, MongoDB, SocketIO.
- **Team Size**: 1.
- **Duration**: 2019.

---

16. Application for Synchronizing a Marketplace Platform with Inventory Management Software

- **Summary**: Developed an application to synchronize products and orders between Prom.ua and "Ukr Sklad." It facilitated the streamlined search, creation, and update of products, as well as order and client management.
- **Key Achievements**:
    - Automated product matching and updates, improving accuracy and efficiency.
    - Increased order processing speed by 500%, eliminating manual data entry.
    - Enhanced price update processes, reducing time by 200% through .xlsx file integration.
- **Role**: Full Stack Developer.
- **Technologies**: JavaScript, Express, REST API, MongoDB, SocketIO.
- **Team Size**: 1.
- **Duration**: 2018.
